EDUCATION

University of Petroleum and Energy Studies (UPES) **2026 - 2030**
B.Tech in Computer Science and Engineering

Army Public School, Birpur **Dehradun, Uttarakhand**
Class XII: 85% | Class X: 96.2%

PROJECTS

AI Resume Analyzer & Matcher **Python | Groq API | Pydantic | JSON | pypdf | python-docx**

- Built an AI-assisted resume analysis pipeline that extracts structured candidate and job-description data using Groq LLM calls and Pydantic models.
- Processes PDF and DOCX resumes, evaluates multiple candidates, and ranks them using deterministic Python scoring across skills, evidence, experience, education, and resume quality.
- Used JSON structured outputs and schema validation to make LLM responses consistent and easier to process programmatically.

AI Portfolio Chatbot **Python | Groq API | JSON | Prompt Engineering**

- Developing an AI representative that answers recruiter questions from a structured candidate profile instead of generating unsupported personal claims.
- Implemented grounded system instructions, conversation history, Groq chat completions, and streaming responses for an interactive portfolio experience.

PROBLEM SOLVING & ACHIEVEMENTS

- Solved 100 coding problems across GeeksforGeeks, HackerRank, LeetCode, and Codeforces, including 28 medium-difficulty problems.
- Participated in a LeetCode weekly contest; Codolio profile records a rating around 1500 and 46 active coding days.

CERTIFICATIONS

- AI Fundamentals: Unleash Your Potential - University of Bristol, Oct 2026.
- Artificial Intelligence for Everyone - Universiti Malaya Students' Union, Oct 2026.

TECHNICAL SKILLS

Languages: Python, C, C++
AI / LLM: Groq API, prompt engineering, structured LLM outputs, JSON, Pydantic
Development: PDF/DOCX text processing, dotenv, API integration
Core: Data Structures & Algorithms, problem solving
Tools: Git/GitHub (basic), Linux (basic), VS Code
